

TOOL SHEET

- **Type:** Code
- **Electronic Device (computer, tablet, web access, GPS...):** Without
- **Name:** The egg riddle
- **Short description:** The code is written on the egg shell but only if you crack and peel it you will see the code written on the egg.
- **Content:** We write the code with a special ink from garlic and vinegar on the shell of a well-boiled egg. The solution penetrates the egg shell and leaves on the surface of the egg a copy of the text, which is erased from the shell. The code can be read when the shell is removed.
- **URL:** none
- **Additional contents (files, image):** none
